

The Ultimate Multi Computing Solution for Your Successful Business

LG Network Monitor

Computing environment is a company's competitiveness

We live in an era where systems of companies never cease to change. It is computers that take care of electronic documented approvals and reports, check and manage work progress, giving a computing environment a significant role in companies' work efficiency.

Now, the global business IT power LG proudly presents the best optimized new solution for the efficient business computing environment that you've never seen before. You are set for the ultimate multi-computing environment with minimized system and efficient operation at the utmost competitive price. LG only offers you the best with the Network Monitor that provides optimized computing environment for business to multiple users with strengthened anti-virus security to leave you with only satisfaction.

Cost Reduction

LG Network Monitor enables an independent 31 computing system of which a single Host PC can operate 31 monitors without PCs, saving 70% on computing system setups, 90% on energy costs and allowing you to maintain the system in best condition for a minimized cost.

Smart System

LG Network Monitor offers the most convenient computing environment in the office when preparing documents, surfing information and using groupware and e-mails. The data is stored and managed in a single hard disc guaranteeing an unmatched sense of security and convenience compared to using many separate PCs.

Eco Green Computing

Most of the PCs have a life span of 3-5 years, whereas over used computers at companies or hotels only can survive for much less. However, LG's green Network Monitor increase its life span remarkably longer minimizing e-waste and cutting over 90% on energy costs having less impact on global warming.

Optimal for Various Business Computing Environments

LG Network Monitor for Business

The smartest computing system

- CEO

LG Network Monitor offered the utmost independent computing environment to many users with the minimized numbers of PCs and software environment that managed efficiently, cutting more than 50% on TCO allowing me to pursue new business opportunities and care for my employee's welfare.

The most convenient working environment

- Office Worker

I don't need PCs or thin client for computing anymore. LG Network Monitor is a fan-noise-free whole package which has all I need in a single monitor such as, software programs for Powerpoint, Excel and Wordprocessor and improved performance in Internet searching. Plus, I have more room on my desk.

The simpler system management

- IT Manager

It has been difficult for me to check the too many PCs on every floor, which made maintenance for a better computing environment quite a challenge. However, LG Network Monitor shouldered the burden by guaranteeing increased security against virus attacks and important data loss. All I have to do is to keep on eye on a single Host PC.

Products

Independent computing for 11 users with a single host PC

D series

Direct connection Mode

N1942HE[19.0"], N1941WP[18.5"], N1742HE[17.0"],
N1742LP[17.0"], N1642WP[15.6"]

- Connection distance: maximum 10m
- PS/2 keyboard/mouse interface
- Built-in speaker
- Multi-media / Internet support
- USB ports on host PC can be assigned to individual users

Recommended PC spec.

- Quad core processor or higher with 3 GB of system memory

Ethernet-based computing for 31 users without distance limitations

E series

Ethernet connection Model

N194WA[19.0"]

- USB 1.1 x 2 ports (Mouse / Key board), USB 2.0 x 2 ports (USB Device)
- Built-in speaker, built-in mic → Allow voice chatting between users
- High performance: Movie playback for up to 20 users at the same time
- USB Ports allow easy uploading and downloading → Active inter communication between managers and users

Recommended PC spec.

- i7 Core or higher with 4 GB of system memory
